Contents of Your VT6-PK Kit

P/N	Description	Quantity
VT6-1B	VT6 PC Board, revision 1B	1
DS89C450-QNL	Ultra High Speed Microcontroller, UNPROGRAMMED	1
AT89LP4052	Keyboard microcontroller, PRE-PROGRAMMED	1
ATF2500C-20JC	EE CPLD 20ns PLCC44	1

IMPORTANT!

The DS89C450 MCU supplied with your kit is UNPROGRAMMED. You must download firmware to it, as described in the manual, before you can use it. The ATF2500C CPLD and AT89LP4052 APU are, however, PREPROGRAMMED.

You may return any kit for a full refund, less the shipping charges, ***provided that it is unopened and unused*** . Unless defective, parts and kits ***cannot be returned once construction is started*** . Look it over carefully and be sure it's what you want *before* you start soldering.

If any part we ship you is defective, we'll replace it provided that you return it with in 90 days of purchase. This doesn't cover parts that are damaged by your mistake, so if you put that IC in backwards and blow it up, please don't send it back to us! All the expensive and hard to get ICs such as CPUs, memories, PLDs, EPROMs, etc. are 100% tested by Spare Time Gizmos before they are shipped, and we know those are OK when they leave our door. If one of the other parts doesn't work and you don't think it's your fault, then we'll take your word for it and replace it for you.

We're sorry, but our warranty does not extend to parts that are damaged by improper construction techniques, especially poor soldering, or ICs damaged by static electricity.
